Tissue salts are safe, effective medicines prepared from homeopathically prepared ingredients. They are pleasant and can safely be taken alone or alongside conventional (allopathic) medicines by the whole family with no side effects or risk of interaction. Current law states that tissue salts can be used for the therapeutic use of any remedies in the treatment of medical conditions unless a medical licence has been issued. The suggested uses for the natural products listed are therefore for guidance only and are based on traditional use, anecdotal evidence and current research. If you have any doubts as to their suitability for your own use then please consult a registered health care professional.

The price for the tablets are the same as the pillules.
